# Screen One

---

## Self-supporting protective screen

Self supporting protective screens provide Health and Wellbeing solutions for workspaces.

Flexible, versatile, stable and easy to clean solution that ensures users are separated from one another whilst maintaining interaction and visual contact.

Screens can be manufactured with or without lower aperture and in several different sizes.

Screen shown with lower aperture is 1000mm wide x 670mm high. Supporting feet 300mm deep.

# Screen Two

---

## Self-supporting protective screen

Screen Two is made from 5mm original Perspex cast clear acrylic with a metal foot.

Size shown is 1000mm wide x 670mm high with supporting feet 150mm deep and lower aperture.

# Screen Three

---

## Self-supporting protective screen

Screen Three are manufactured from 5mm original Perspex cast clear acrylic with a circular metal stability foot. Screen heights are 600mm in widths from 600mm up to 2000mm, in 200mm increments. Or 25mm less in widths as shown. Screens can be manufactured with or without lower aperture.

Metal feet are finished in silver, but can also be powder coated in white, grey or black. Perspex can also have a colour tint.

# Screen Four

---

## Plug-on protective screen

Plug-on protective screens provide health and wellbeing solutions for existing workspaces.

A sturdy, simple to attach and easy clean solution that ensures users are separated from one another whilst maintaining interaction and visual contact.

Screen Four are manufactured from 5mm original Perspex cast clear acrylic with metal attachment brackets. Screen finished height is shown at 600mm, but different heights and widths to work with your current screens can be produced.

The plug-on brackets are made to work with different screen thicknesses shown here finished in white, but can also be powder coated in silver, grey or black. Perspex can also have a colour tint.

# Screen Five

---

## Clamp-on protective screen

Clamp-on protective screens provide health and wellbeing solutions for existing work spaces. The clamped version provides a fixed solution which is simple to attach to any work surface in numerous positions with several bracket options.

With all screens this is an easy to clean solution that ensures users are separated from one another whilst maintaining interaction and visual contact.

Screen Five is manufactured from 5mm original Perspex cast clear acrylic with metal bracket attachment.

Screen heights are 600mm in widths from 600mm up to 2000mm in 200mm increments. Or 25mm less in width as shown.

# Eze-Sneeze
